Dear Pela 1963

I have no words that can express our appreciation of the wonderful evening that we had the privilege of spending with you all "en intimité" on Saturday & my gratitude for all the trouble that you took to receive us so splendidly.

We were charmed by your children & please tell them that we enjoyed "Mary, Mary" as much as they thought we should. They are so much like our own children were at their age.

I am sending you separately the name & address of Paloma's ex maid in case she may be useful to you. She is a most refined & charming young woman & very competent

She goes to several ladies but she is sure to have some free days & can make a change in her engagements, as she has done these days for me, if you require her urgently.

The young Prince Carlos de Borbon lives at 28 East 55th St - Apt. 3R. phone: Plaza 9-4947. - If ever you ring him up it must be in the evening because he works all day & leaves very early in the morning. He was so pleased last night & so grateful for your invitation. I think he finds it rather hard over here having led a family life always. He has been lucky to get some nice rooms & a nice room-mate but of course he has to fend for himself.

Manolo sends you his very kind souvenirs as also to your children & believe me yours most sincerely
