Dear Maestro,

If all the persons in the world you are one of my favorite people, for your musical genius has provided joy and refreshment to millions of people.

To me there is no greater calling than to enrich the lives of those about you. You possess the very happy faculty of not only bringing pleasure to those in your presence, but you seem to exude

Parzival in so doing.

I would be most highly honored to have your autograph to place alongside that of your friends Jozefine Kepez and Iza Przegalinski.

If some later time you may see fit to send me your autographed photograph I would be doubly elated.

Respectfully,
